EXPERIENCE AND PROJECTS

Overview

8 Years of Personal Projects Experience and 2 Years of freelancing Experience

📅 May 2016- Today   📍 Cairo

- still learning more and more

ShopAPI

Personal Project

📅 June 2022- April 2024

- an API for an online e-commerce shop
- Supports having Products and Variants for a single product
- Supports packages that each can contain multiple products
- has a basic user accounts system
- Languages and Tools :
  - C# .NET Core ASP.NET   Swagger UI   Docker   Visual Studio
  - SQLite   SQLiteStudio

JsonTokens

Personal Project

📅 Jan 2024- march 2024

- a simple C# Library implementing a new type of Token for API use
- Based on JSON
- supports storing C# objects
- supports pre-processing to be added between when the token is used on the API and when the token is being sent to the user
- Language used is C#
- IDE- Visual Studio

---

GeTop API

Personal Project

📅 October 2022- April 2024

- an API that is designed to handle "social media like" website for something like posts videos and images
- supports storing images
- supports storing videos
- It has an Accounts System with a Multi-Method Authentication System that allows for authenticating with multiple methods and this could be a platform for implementing MFA (Multi-Factor Authentication)
- supports storing posts
- Language used is C# .NET Core
